Professional Summary

UX executive with 20+ years designing and leading AI/ML product experiences that generate measurable business outcomes. Specialized in transforming complex machine learning systems into intuitive interfaces for enterprise users — from conversational AI platforms processing 50M+ monthly interactions to ML model-training tools that cut setup time from 3 weeks to 2 days. Track record of \$60M+ combined revenue impact, 35% platform adoption gains, and 92% system failure prevention across AI, healthcare, and e-commerce. Expert at scaling high-performing design teams, establishing design systems, and navigating HIPAA/FDA/WCAG regulatory requirements.

Core Competencies

- **AI/ML UX Design:** Conversational AI interfaces, ML training UIs, anomaly detection systems, AI-powered analytics dashboards, prompt/response UX
- **Leadership:** Team building & scaling, design org strategy, roadmap ownership, OKR-aligned execution, stakeholder management, Agile/JIRA
- **Design Execution:** Figma (advanced: tokens, variants, auto-layout, prototyping), design systems, information architecture, WCAG/ADA accessibility
- **Research & Data:** User research, usability testing (UserTesting, Maze), large dataset visualization, analytics dashboard design
- **Regulatory:** HIPAA, FDA 510(k) UX compliance, WCAG/ADA enterprise standards, financial services regulatory UX
- **AI Tools:** ChatGPT/GPT-4, Claude, Midjourney, Adobe Firefly, Notion AI, Perplexity AI

Professional Experience

Self-Employed | **UX Design Director & Principal AI/ML Consultant** | Consulting

Director-level UX engagements for enterprise AI companies requiring specialized leadership for ML-powered platforms. Defined UX strategy, owned design roadmaps, and drove OKR-aligned outcomes across three client organizations.

Humanyze — **Principal AI Designer** Aug 2025 – Oct 2025

Enterprise social media competitive intelligence platform serving marketing directors and C-suite at Fortune 500 brands.

- Redesigned core analytics interface and data visualization strategy, transforming millions of social data points into executive-ready competitive insights
- Created sentiment analysis dashboards that reduced executive decision-making time by streamlining competitive analysis workflows; findings presented directly to C-suite stakeholders
- Built comprehensive component library and design system, establishing scalable UX standards and reducing design-to-dev handoff time

Kasisto — Head of UX Design Jan 2025 – Jul 2025

Enterprise conversational AI platform powering digital assistants for Fortune 500 financial institutions handling 50M+ monthly customer interactions across 3 product lines.

- Drove 35% platform adoption increase by owning the end-to-end UX roadmap across 3 product lines — including stakeholder alignment, design strategy, and execution
- Reduced ML model setup time from 3 weeks to 2 days by redesigning training interfaces to empower non-technical banking professionals; presented ROI case to executive leadership
- Built real-time analytics dashboards supporting performance optimization across 200+ use cases for Fortune 500 banking clients
- Defined UX team processes and mentored junior designers in AI/ML UX principles, increasing team velocity and output quality

Ottermon AI — Lead UX Designer, AI Monitoring Jan 2024 – Jan 2025

Enterprise AI monitoring platform for infrastructure and DevOps teams. Designed UX for anomaly detection and predictive failure systems across 15+ infrastructure modules.

- Designed anomaly detection UI that prevented 92% of system failures pre-impact, delivering measurable uptime improvements for enterprise clients
- Built analytics dashboards that reduced mean time to resolution (MTTR) by 50% through actionable data visualization
- Owned design system strategy supporting 15+ infrastructure modules, establishing unified UX patterns and scalable component governance
- Partnered with ML engineers to design model training interfaces for custom anomaly detection algorithms
- Conducted user research with DevOps professionals to map workflow pain points and reduce context switching

HealthCare.com | Senior UX Manager | Full-Time

AI-powered healthcare platform matching users with health and supplemental insurance using ML-driven personalization and real-time health scoring.

- Improved decision speed by 40% and lowered user costs by 25% by leading design of an AI-driven healthcare recommendation platform
- Designed ML-powered health scoring and analytics dashboards that transformed raw health data into preventive, strategic insights
- Increased user engagement with preventive care by 35% through predictive health scoring interfaces identifying risks and recommending interventions
- Designed HIPAA-compliant UX across cost tracking, benefit optimization, and AI health scoring — enabling enterprise adoption while maintaining regulatory integrity

FCP Euro | Senior UX Director | Full-Time

Premier e-commerce platform serving European car enthusiasts with 350,000+ genuine and performance parts. Built the UX function from the ground up.

- Generated \$6M in additional annual revenue through a 5% conversion rate increase achieved in 3 months — result of a ground-up redesign of the parts-finding experience
- Reduced support call volume by 45% through strategic UI improvements informed by call center analytics
- Built and scaled the UX team from zero, establishing data-driven design process, tooling, and standards across the org

Wayfair | Senior UX Design Manager | Full-Time

Led UX strategy for CastleGate, Wayfair's \$2B+ logistics platform managing ocean freight, drayage, and last-mile delivery for furniture and home goods.

- Saved \$16M in operational costs by leading system design that reduced supplier time-on-task by 8 hours daily across thousands of active suppliers

- Reduced customer success manager time-on-task by 18 hours weekly through information architecture optimization
- Managed a cross-functional team of 5 designers, content writers, and PMs, including successfully mentoring 2 employees off performance improvement plans

Hexaware Technologies | Principal UX Designer | Full-Time

UX design lead for Fortune 500 enterprise clients across healthcare, retail, fitness, and media.

- Increased Panera Bread mobile orders by 40% by designing a menu navigation and customization experience optimized for mobile-first ordering
- Designed UPMC healthcare platform improving patient care workflows and medical data integration for clinical staff
- Created Weight Watchers wellness platform supporting millions of users with personalized nutrition tracking and community engagement
- Built platforms for Wawa, Comcast Tech Nucleus, Reebok ONE, and Weather Channel — spanning retail POS, enterprise tech, fitness wearables, and media

Career Impact Highlights

- \$60M+ combined revenue impact and cost savings across AI, healthcare, e-commerce, and enterprise platforms
- 50M+ monthly users served across AI products — including conversational AI platforms for Fortune 500 financial institutions
- 35% platform adoption increase at Kasisto; 5% conversion lift (\$6M revenue) at FCP Euro; 40% decision speed improvement at HealthCare.com
- 92% system failure prevention rate through anomaly detection UI design at Ottermon AI
- FDA 510(k)-compliant medical device interfaces and HIPAA-compliant enterprise healthcare platforms
- Led 20+ cross-functional teams; built UX functions from the ground up at multiple organizations
