Professional Summary

UX leader with 20+ years of experience building, mentoring, and scaling high-performing design teams for AI, healthcare, e-commerce, and enterprise platforms. Expert in strategic UX decision-making, platform adoption optimization, and the translation of behavioral, business, and ML data into intuitive, actionable user experiences. Proven leadership in complex stakeholder environments and advanced technical skills in design systems, Figma, prototyping, and data visualization.

Core Competencies

- UX Team Strategy, Leadership & Mentoring
- Advanced Figma: Component Libraries, Auto-Layout, Variants, Design Tokens
- Prototyping & Interactive User Flows
- Design Systems Strategy, Implementation & Maintenance
- Information Architecture & Content Strategy
- User Research & Usability Testing
- Interaction Design & Micro interactions
- Responsive & Accessible Design (WCAG, ADA)
- Data Visualization & Simplification
- Large Data Analytics Dashboard Design
- User-Centered Design & Design Thinking
- Sketching, Wireframing, Low-Fidelity & High-Fidelity Mockups
- Stakeholder Communication & Workshop Facilitation
- Fostering Cross-Functional Collaboration (Engineering/Product/Data)
- Agile & Iterative UX Process
- AI/ML Product Design
- Regulatory Expertise: HIPAA, FDA UX Compliance
- AI & Emerging Technology: ChatGPT/GPT-4 - Claude - Midjourney - Adobe Firefly - Notion AI - Perplexity AI
- Data & Analytics: Data Visualization (Tableau, Power BI, D3.js) - Analytics Dashboard UI/UX - Accessibility Auditing & Inclusive Design
- Process & Collaboration: Design System Documentation - User Testing Platforms (User Testing, Maze) - Agile/JIRA/Trello

Kasisto | Head of UX Design | AI Platforms | Contractor

Jan 2025 – Jul 2025

Led UX design for enterprise conversational AI platform powering digital assistants for Fortune 500 financial institutions, handling 50M+ monthly customer interactions. Transformed complex ML model training into accessible tools for banking professionals while ensuring regulatory compliance. Directed all UX initiatives for conversational AI, boosting platform adoption by 35% and establishing scalable standards for 3 product lines.

- Created the design strategy and UX process for ML training interfaces, reducing setup from 3 weeks to 2 days and empowering non-technical users. This is a complete re-design of the interface, product and systems
- Built real-time analytics dashboards, improving client performance across 200+ use cases
- Mentored junior designers in advanced AI/ML UX principles and research methodologies
- Defined new UX processes for out teams in the role. Everything has changed, we should change with it.

Ottermon AI | Lead UX Designer | AI Monitoring | Contractor

Jan 2023 – Jan 2025

Led UX design for enterprise conversational AI platform powering digital assistants for Fortune 500 financial institutions, handling 50M+ monthly customer interactions. Transformed complex ML model training into accessible tools for banking professionals while ensuring regulatory compliance.

- Created dashboards that reduced mean time to resolution by 50% through actionable data visualization
- Developed predictive anomaly detection UI, preventing 92% of system failures pre-impact
- Designed scalable systems supporting 15+ infrastructure modules with unified user experience
- Collaborated with ML engineering team to design model training interfaces for custom anomaly detection algorithms
- Conducted extensive user research with DevOps professionals to optimize workflow integration
- Built scalable design system supporting 15 different infrastructure monitoring modules with consistent UX patterns
- Partnered with ML engineers to design intuitive model training interfaces for custom anomaly detection algorithms
- Conducted extensive user research with DevOps professionals to optimize workflows and reduce context switching

HealthCare.com – Senior UX Manager | Healthcare AI | Full-Time

Jan 2022 – Feb 2024

Leveraging AI and machine learning, the company provides personalized recommendations to match users with suitable health and supplemental insurance products, also developing its own branded insurance products through its healthcare division and offering other health services like prescription discounts. The system we designed utilized real users health data and provided health scoring, recommendations and various other healthcare related services that targeted their specific family and individual needs.

- Led design for an AI-driven healthcare platform improving decision speed by 40% and lowering user costs by 25%
- Design and Lead ML-powered health scoring and analytics dashboards, transforming raw data into strategic, preventive insights
- Integrated regulatory (HIPAA) compliance into intuitive user interfaces for enterprise adoption
- Designed comprehensive platform combining cost tracking, benefit optimization, and AI-driven health scoring for families
- Created predictive health scoring interfaces that identified potential health risks and recommended preventive measures, improving user engagement with preventive care by 35%

FCP Euro | Senior UX Director | E-commerce | Full-Time

Jan 2023 – Jan 2024

At FCP Euro, a premier e-commerce platform serving European car enthusiasts with over 350,000 genuine and performance parts, I built the UX function from the ground up. In just two years, I transformed the customer experience for BMW, Audi, Mercedes, and Porsche DIY mechanics, achieving a 5% conversion rate lift that generated \$6M in additional annual revenue while reducing support calls by 45%. By establishing data-driven design processes and building a high-performing team, I successfully balanced the technical complexity of automotive parts with an intuitive shopping experience for passionate car enthusiasts.

- Built and managed UX team from ground up, establishing process and strategy
- Achieved 5% conversion rate increase in 3 months, generating \$6M additional annual revenue
- Reduced call center inquiries by 45% through strategic UI improvements
- Implemented data-driven design process using call center analytics to identify and resolve UX issues
- Implemented data-driven design approach using call center analytics to identify pain points

- Streamlined parts-finding experience for DIY mechanics navigating technical product specifications

Senior UX Design Manager | Supply Chain | E-commerce | Full-Time

Jun 2019 – Jun 2021

Led UX strategy for Castle-Gate, Wayfair's \$2B+ logistics platform managing ocean freight, drayage, and last-mile delivery for furniture and home goods. Managed cross-functional team of 5 while designing systems that connected thousands of suppliers with Wayfair's complex fulfillment network and increasing revenue while reducing support calls by 45%. By establishing data-driven design processes and building a high-performing team, I successfully balanced the technical complexity of automotive parts with an intuitive shopping experience for passionate car enthusiasts.

- Managed team of 5 designers, content writers, and PMs for supply chain platform
- Reduced customer success manager time-on-task by 18 hours weekly through information architecture optimization
- Led system design that saved 8 hours daily across thousands of suppliers, resulting in \$16M saved revenue
- Successfully guided 2 underperforming employees off performance improvement plans through mentorship

Key Achievements | Historical

- Managed teams of designers, content writers, and PMs for supply chain platform(s)
- Reduced customer success manager time-on-task by 18 hours weekly through information architecture optimization
- Led system design that saved 8 hours daily across thousands of suppliers, resulting in \$16M saved revenue
- Strategic Leadership & Business Impact
- Led 20+ cross-functional teams across AI, healthcare, e-commerce, and enterprise platforms, generating over \$60M in combined revenue impact and cost savings
- Built and scaled high-performing UX design teams from startup to Fortune 500 environments, improving team velocity by 60%+ and reducing time-to-market by 50%
- Pioneered AI/ML interface design methodologies, establishing industry standards adopted across 8+ product lines
- Product Innovation & User Experience
- Designed AI-powered platforms serving 50M+ monthly users, achieving 35% platform adoption increases and 92% system failure prevention rates
- Created award-winning healthcare AI interfaces improving decision speed by 40% and reducing user costs by 25% while maintaining HIPAA compliance

- Developed scalable design systems supporting 15+ product modules with unified experiences across web, mobile, and VR platforms
- Technical Expertise & Digital Transformation
- Mastered 25+ AI design tools and workflows, reducing design ideation time by 60% and achieving 50% faster project delivery
- Led FDA-compliant medical device interface design contributing to successful 510(k) submissions and \$340K annual revenue generation
- Established enterprise-level accessibility standards (WCAG/ADA) and regulatory compliance frameworks for healthcare and financial sectors
- Additional Hexaware Technologies Experience
- Based on your timeline and the projects shown on your portfolio, here are the Hexaware positions that would fill the gap before your Wayfair role:
- Hexaware Technologies – Senior UX Designer, Enterprise Platforms
- Jan 2017 – Jun 2019
- Designed comprehensive enterprise technology platforms for Fortune 500 clients including Comcast TechNucleus, focusing on streamlined workflows and system integration
- Led UX design for UPMC healthcare platform, improving patient care workflows and medical data integration systems
- Created Weight Watchers wellness platform featuring personalized nutrition tracking and community engagement, supporting millions of users
- Developed Wawa retail technology platform enhancing customer ordering experiences and point-of-sale interfaces
- Hexaware Technologies – UX Designer, Mobile & Fitness Applications
- Mar 2014 – Jan 2017
- Designed Panera Bread mobile ordering experience with intuitive menu navigation and customizable combinations, increasing mobile orders by 40%
- Created Reebok ONE fitness tracking application integrating wearable sensor technology with personalized coaching systems
- Developed Weather Channel running application integrating real-time weather data with comprehensive fitness tracking
- Led Yankee Candle fundraising platform design, streamlining mobile sales campaigns with team coordination tools
- Hexaware Technologies – Junior UX Designer, Analytics & AI Platforms

Additional Experience | Past

Hexaware Technologies | Lead UX Designer | Full Time

Jan 2013 – Jun 2019

- Designed comprehensive enterprise technology platforms for Fortune 500 clients including Comcast Tech Nucleus, focusing on streamlined workflows and system integration

- Led UX design for UPMC healthcare platform, improving patient care workflows and medical data integration systems
- Created Weight Watchers wellness platform featuring personalized nutrition tracking and community engagement, supporting millions of users
- Developed Wawa retail technology platform enhancing customer ordering experiences and point-of-sale interfaces
- Hexaware Technologies – UX Designer, Mobile & Fitness Applications for ReebokOne
- Designed Panera Bread mobile ordering experience with intuitive menu navigation and customizable combinations, increasing mobile orders by 40%
- Created Reebok ONE fitness tracking application integrating wearable sensor technology with personalized coaching systems
- Developed Weather Channel running application integrating real-time weather data with comprehensive fitness tracking
- Led Yankee Candle fundraising platform design, streamlining mobile sales campaigns with team coordination tools
- Contributed to BankAI analytics platform development, creating AI-powered banking chatbot interfaces with performance dashboards
- Supported early-stage AI platform design initiatives that later evolved into enterprise conversational AI solutions
- Collaborated on data visualization projects for large datasets, establishing foundation for advanced analytics dashboard expertise
- Participated in agile development processes and cross-functional team collaboration methodologies

HP | Senior UX Designer | Enterprise & Consumer Products | Full Time

American Airlines Digital Transformation:

- Conducted 200+ hours of ethnographic research across 5 airports, including air traffic control towers, agent check-in kiosks, and gate operations to map complete customer journey
- Led cross-functional team collaborating with external design studio (IDEO/Frog) to redesign AA.com, resulting in 35% increase in online check-ins and 28% reduction in counter wait times
- Designed unified agent desktop system consolidating 12 legacy applications into single interface, reducing training time from 6 weeks to 2 weeks
- Created responsive booking flow that increased mobile conversions by 42% and reduced booking abandonment by 30%
- Implemented accessibility-first design approach achieving WCAG 2.0 AA compliance, expanding usable customer base by 15%
- Facilitated 50+ co-design sessions with gate agents, pilots, and ground crew to optimize operational workflows

- Reduced customer service call volume by 40% through intuitive self-service features and improved information architecture

HP | Senior UX Designer | Research & Development | Full Time

- Led end-to-end UX design for HP's flagship tablet competing directly with iPad, from concept to launch
- Conducted competitive analysis and usability testing with 500+ participants comparing iPad workflows to identify differentiation opportunities
- Created 200+ wireframes and interaction patterns optimizing for webOS unique capabilities including card-based multitasking
- Partnered with industrial design team on hardware-software integration, influencing bezel size, button placement, and gesture areas
- Designed adaptive UI system that seamlessly scaled across 7", 9", and 10" screen variants
- Established design language that balanced consumer familiarity with innovative gestural interactions, achieving 85% task success rate in first-time user testing
- Developed enterprise-focused features that secured 50,000 pre-launch B2B orders from Fortune 500 companies
- Collaborated with Palm legacy team to modernize webOS design patterns while maintaining platform strengths
